Our Capabilities

INJECTION WORKS Knows Injection Molding – Design, Tooling, Processes

DESIGN FOR MANUFACTURABILITY

Our Engineers are problem-solvers, helping to transform raw ideas into finished products that help our customer thrive

PROJECT MANAGEMENT

Our Project Managers consistently help our customers achieve their schedule, production, quality & price targets

TOOLING DEVELOPMENT & MAINTENANCE

Our Tooling Team helps develop new tools, refurbish transfer tools and protects customer assets with a comprehensive maintenance program

MANUFACTURING SIMPLICITY

Our Production Team is capable and equipped to design, make, decorate, and assemble all under one roof

Our Customers Appreciate...

INJECTION WORKS VALUE ADDED SERVICES

PROTOTYPE DEVELOPMENT

Injection Works' onsite Fortus 3D printer enables customers to evaluate pre-production design options

IQMS-ERP AND CUSTOMER CONNECT

Injection Works' customers enjoy always knowing the status of their orders 24/7

CONTROLLED PRODUCTION ENVIRONMENT

Injection Works' multiple clean rooms provide clients with controlled production environment options

COMMITMENT TO QUALITY

Injection Works is ISO 9001:2015 certified and equipped with advanced automated inspection technology

Our Customers...

1

ARE WELL DIVERSIFIED

A balanced blend of domestic and international OEM's, including consumer goods, electronics, food & beverage, industrial, medical, office furnishings, and transportation

2

HAVE UNIQUE NEEDS AND REQUIRE SPECIALIZED TECHNICAL EXPERTISE

70% of clients were unsatisfied with their previous molding supplier and transferred molding to IW. Some require expertise such as over-molding and variety of decorating options

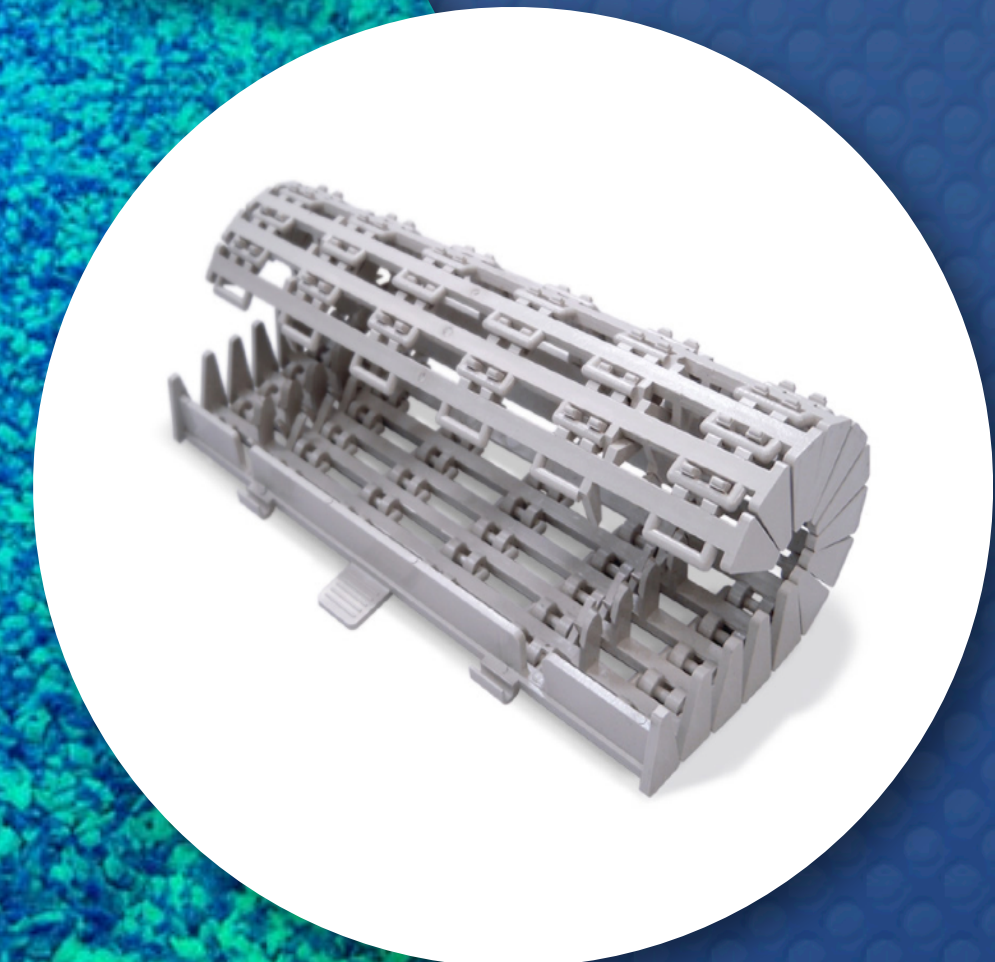

3

REQUIRE SUPPLY CHAIN FLEXIBILITY & ENJOY THE MADE IN USA ADVANTAGE!

Recent events has forced some customers to transfer tooling from overseas to minimize supply chain disruption and they now benefit from IW product quality and dependability

Our Products...

- 1 Are typically highly engineered components
- 2 Utilize specialized performance resins and custom alloys
- 3 Require precision, consistency, repeatability and traceability
